I. Main Contributors to the Headline Inflation

The main contributor in Camarines Sur's overall inflation during the month of June 2024 was Food and Non-alcoholic Beverages with an inflation rate of 8.0 percent. This equates to 66.4 percent share or 3.65 points contribution to the province inflation. The main contributor to the inflation in this commodity group is Rice with a 31.6 percent inflation rate. This accounts to 60.3 percent share, or 3.32 points.

Transport was the second contributor to the province's inflation rate with a 11.3 percent share or 0.62 points, while the third primary driver was Clothing and Footwear with an 5.8 percent share or 0.32 points.

II. Main Drivers to the Uptrend of the Headline Inflation

The uptrend in the overall inflation in June 2024 was primarily influenced by the higher year-on-year increase in Housing, Water, Electricity, Gas and Other Fuel at 0.9 percent during the month from -4.8 percent in the previous month. The higher annual growth rate in Food and Non-Alcoholic Beverages which recorded 5.7 percent in May 2024 to 8.0 percent in June 2024 also contributed to the uptrend of overall inflation.

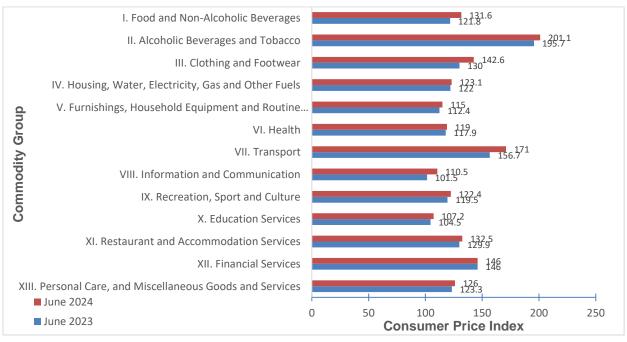

In addition, inflation rate in the following commodity groups also increased:

- 1. Alcoholic Beverages and Tobacco, 2.8 percent;
- 2. Clothing and Footwear, 9.7 percent;
- 3. Health, 0.9 percent, and
- 4. Personal Care, and Miscellaneous Goods and Services, 2.2 percent.

On the other hand, the following commodity groups registered slower increase in the inflation rate during the month: Furnishings, Household Equipment and Routine Household Maintenance, 2.3 percent; Transport, 9.1 percent; and Recreation, Sport and Culture, 2.4 percent.

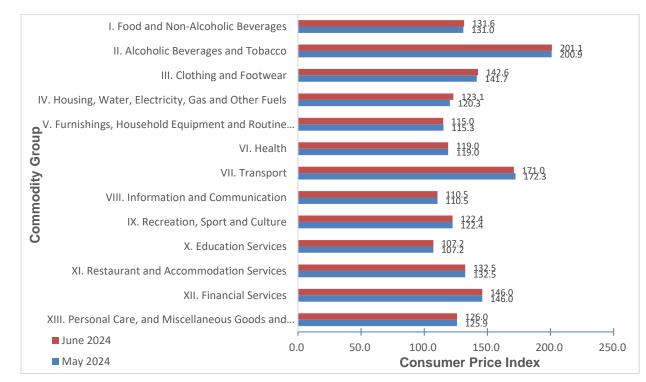

Meanwhile, Information ang Communication, Education Services, Restaurant and Accommodation Services retained its previous month's inflation rate, while Financial Services recorded zero percent annual growth.

Purchasing Power of Peso drops to PhP 0.76 in June 2024

In Camarines Sur

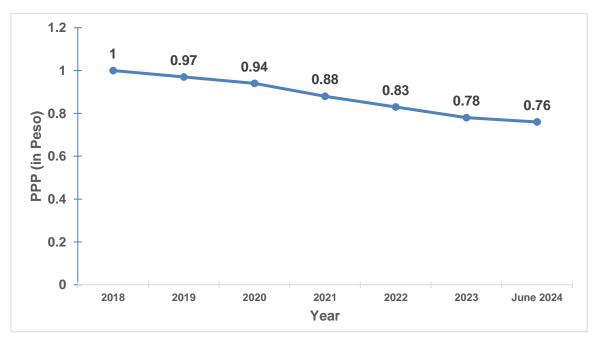

Source: Survey of Retail Prices of Commodities for the Generation of CPI, Philippine Statistics Authority (PSA)

The Purchasing Power of Peso (PPP) in the province of Camarines Sur decreased to 0.76 in June 2024.

This means that a peso in 2018 is only worth 76 centavos in June 2024, or you need PhP131.90 to purchase the same volume of goods and services worth P100.00 in 2018.

Purchasing Power of Peso (PPP) is inversely related to inflation rate. Thus, as the inflation rate increases, PPP declines. Figure 4 shows that in Camarines Sur, PPP has been decreasing on the average of 0.04 annually from 2018 to 2023. The PPP in 2023 was 0.78. This implies that the PhP1.00 in 2018 as the base year, values only PhP0.78 in 2023.

TECHNICAL NOTES

CONSUMER PRICE INDEX (CPI)

The CPI is a measure of the changes in the average price level of goods and services that most people buy for their day-to-day consumption. It measures the composite change in the consumer prices of various commodities over time.

COMPONENTS OF CPI:

A. Base Period

The reference date or base period is the benchmark or reference date or period at which the index is taken as equal to 100. Starting January 2022, the base period is 2018.

B. Market Basket

A sample of the thousands of varieties of goods purchased for consumption and services availed by the households in the country selected to represent the composite price behaviour of all goods and services purchased by consumers.

C. Weighting System

The weighting pattern uses the expenditures on various consumer items purchased by households as proportion to total expenditure.

D. Formula

The formula used in computing the CPI is the weighted arithmetic mean of price relatives, the Laspeyre's formula with a fixed base year period (2018) weights.

E. Geographic Coverage

CPI values are computed at the national, regional, and provincial levels, and for selected cities.

INFLATION RATE

The inflation rate is the annual or monthly rate of change of the CPI expressed in percent. Inflation is interpreted in terms of declining purchasing power of money.

HEADLINE INFLATION RATE

The headline inflation rate refers to the rate of change in the CPI, a measure of the average standard "basket" of goods and services consumed by a typical family.

YEAR-ON-YEAR INFLATION RATE

Year-On-Year Inflation Rate is the annual percentage change of CPI. For example, the percentage change of CPI between June 2023 and June 2024.

MONTH-ON-MONTH INFLATION RATE

Month-On-Month Inflation Rate is the monthly percentage change of CPI. For example, the percentage changes of CPI between June 2024 and May 2024.

PURCHASING POWER OF PESO (PPP)

The purchasing power of peso (PPP) shows how much peso in the base period is worth in the current period. It is computed as the reciprocal of the CPI for the period under review multiplied by 100.

For example, the PhP 1.00 in 2018 is valued only at PhP 0.78 in 2023.
